

SDSL Broadband

Professional broadband services for your business

SDSL Professional broadband services provide the ultimate Internet connection for your business. Contention ratios are even lower than normal ADSL connections and the synchronous nature means the same speed both up and down link. Professional broadband services through SaneSDSL are cost-effective and offer an excellent alternative to leased lines.

SaneSDSL Professional services are ideal for VPN office connectivity, VoIP services or for connection to a dedicated web server. All SDSL services come with business-class support and SLA's.

Service benefits include

- Professional grade services for businesses
- Equal upstream speeds as downstream
- 0.5Mb/1Mb/2Mb services available
- 10:1, 5:1 and 1:1 contention ratio with unmetered transfer
- Single and block IP addresses available
- Advanced pre-configured routers and modems
- No long term commitments
- No usage restrictions
- Business-class UK-based customer support
- SLA available for maximum service availability
